**My primary focus has been on the front-end, where I have cultivated skills in HTML, CSS, and JavaScript over the past four years. Additionally, I have expanded my knowledge by incorporating technologies such as React and Bootstrap into my arsenal. My background reflects my passion for learning and my determination to gain experience and knowledge in web and mobile application development.**

## Professional Experience

---

### Cetis 100 High School

August 2020 - June 2023

Front-End Associate

I started working with HTML and CSS before entering high school where during my first year I was able to learn JavaScript so I started working as an associate for a thesis at the university of Tepic, Nayarit Mexico as well as helping to create the official site, my high school is considered technical, so I graduated with a degree in Developer technician with a total programming time of 3 years. and I have experience in HTML, CSS, JavaScript and MariaDB (1 Year) as well as learning React and Bootstrap (Actual).

## Education

---

High School Diploma in Software Developer Associate August 2020 - June 2023

High School Cetis 100 at Tepic, Nayarit, México

My stay in high school was successful, I was awarded student of the year in the field of programming for 2 years, which would be my 2nd and last year, as well as I performed in the best way to the point where I helped my teachers with practices and contributed ideas to thesis related to the field.
